

Fine Arts Task Force – School Board Update

Purpose:

To inform School Board members of Task Force's progress, what we've learned and what we're planning to do as well as discuss challenges we've faced.

Description:

The Fine Arts Task Force has had a number of discussions, reviewed data, developed an approach and will be collecting and analyzing information this Fall. Prior to the analysis, discussions with the community and final summaries, the Fine Arts Task Force would update the School Board's Performance and Achievement Committee on our progress, next steps and timeline in November. This meeting would be publicity noticed, so community members can attend, but would not be able to participate. A possible later community meeting would be in order where feedback/discussion with the community would take place prior to finalizing information for the School Board.
