

Question: The budget reduces unallocated teacher and SEA positions from Special Ed - How many unallocated positions were in the budget for 05-06? and how many of those were used during the year - or how many still are unallocated now?

Answer: We had approximately 10 unallocated positions at this time last year. Those are the 10 allocations that are being eliminated in this budget. They have all been used this year. The impact of this cut is that we will not have allocation to adjust except from the Reserve for Contingencies. We also may be able to capture a small amount of allocation from the carryover from the IDEA grant for next year.
